

PhD DEGREE-SEEKING PROGRAM

This UNMC-CSC program not only aims to recruit bright and hardworking young scientists from top Chinese universities and institutions to UNMC but to also provide excellent training to Chinese students, scientists, physicians, nurses and other health professionals under the guidance of outstanding research scientists and clinical faculty members at UNMC.

Students will train and perform research projects supported by a principal investigator at UNMC for 4 to 5 years in a program very similar to that of a regular UNMC graduate student seeking a PhD degree from UNMC. Upon completion of this training, a PhD will be awarded from UNMC.

Since 2008, more than 70 students have been recruited into the Degree-Seeking Program at UNMC!
